

return to take the man on the ground that his sickness was rather suspicious. Health Board, and when the official physician reached the man he found him suffering from over-eating.

The twenty-two new doctors added to the health board yesterday will not report duty until Monday. They will be under the jurisdiction of Dr. Roberts for emergency service.

The quarantining of East Sixteenth street, from Avenue B to the East River, goes into effect today. A large sign will be placed at the street, and no one will be allowed to pass except those connected with the Health Board.

Four Girls to Be Kept Isolated. Referring to the isolation of the immigrant girl to whom it is believed the source of the epidemic in the Minnie Levinger case may be traced, Dr. Roberts said that it was the intention of the department to keep her isolated and under observation for ten days. No sign of cholera or any other form of disease had appeared among them, and there was little likelihood of such.

There were many calls at the Health Board this morning. A large number of whom were bent on seeing President Wilson for the purpose of offering suggestions for the betterment of the health of the city.

Chief Goldberger and a half dozen reporters were introduced when the man declared that he wanted to see President Wilson for the purpose of explaining to him the alleged merits of his "process for sterilizing the contents of a sink." The man did not see President Wilson.

Action of the Health Board. The conference between President Wilson and Dr. Brant, developed into a full-scale meeting of the Board on the arrival of President Martin, of the Police Board.

The only business of the Board, however, was the passing of a resolution directed to the Police Board, calling for a special investigation of the health of the city. The resolution was due to the fact that the Health Board had been working strenuously by drawing upon its sanitary squad to do duty at interested houses to the neglect of their regular work.

The resolution was passed by a vote of 10 to 2. The dissenting vote was cast by Dr. Brant and Dr. Martin. The resolution was passed by a vote of 10 to 2. The dissenting vote was cast by Dr. Brant and Dr. Martin.

A matter that caused a good deal of discussion during the meeting was the receipt of a letter from Dr. J. Mitchell Prudden, accepting the appointment of consultant in bacteriology and disinfection of the Health Board recently tendered him. Dr. Prudden wrote:

I accept with pleasure the appointment of the Board of Health as consultant in the division of bacteriology, bacteriology and disinfection, and wish to express my appreciation of the confidence of the Board in my nomination in this position.

President Wilson at 11:30 o'clock left the Health Board for the purpose, it was said, of conferring with Mayor Grant.

Danger Line Has Not Been Passed. An impression seems to have gone abroad that in view of the cholera outbreak in the East River, the danger line has been passed in the city.

There is danger yet, but the Board of Health believes that the danger line has not been passed. The Board of Health believes that the danger line has not been passed. The Board of Health believes that the danger line has not been passed.

When Dr. Roberts was asked about this matter today he replied: "I can hardly say the danger line is passed. I do not believe that the cholera will become epidemic, nor do I think that it will spread from its initial cases."

Wherever a case arises our precautions are so nearly perfect that it will be almost impossible for it to communicate itself to others. Gen. Clark, Secretary of the Health Board, said: "Of course, cholera is a very contagious disease, but it is not as contagious as it is often represented to be."

President Wilson's opinion. President Wilson's opinion was that the danger line has not been passed. He said: "I am not a doctor, but I am a man of common sense. I believe that the danger line has not been passed."

Dr. Bryant spoke freely and said: "It is a problem with which we are all familiar. The past is not the best guide. The future is the best guide. The future is the best guide. The future is the best guide."

Levy & Wertheimer at 80 White street, New York.

Health Board's Surveillance of Houses Where Cholera Has Occurred. The condition at the houses in this city where cholera cases have occurred is today being enquired.

At 402 Second avenue, from whence Mary Connelly was removed, a big sign is being erected. The health of the tenants is said to be without a cloud.

The same holds good also of most of the other houses.

No. 411 East Forty-seventh street, where Minnie Levinger died, and from which her husband was removed, is being disinfected by the Willard Parker Hospital, has assumed an air of cleanliness very gratifying in contrast with its former appearance.

Here, as well as at the other houses, the tenants are not at all frightened, and still cling to the belief that it is not cholera but a violent form of dysentery that has invaded the city.

This conviction is also firm at 1025 Madison avenue, where Hopper died. A sign is being erected at the entrance to the building, and a sign is being erected at the entrance to the building.

in readiness for the reception of quarantined passengers, and asked the Health Officer to let him know when they might be expected.

Surgeon Hamilton's request to be relieved was granted this morning. He desires to be connected with a camp where none but immigrants will be received.

Surgeon Hamilton, of the Boston Marine Hospital, will take Dr. Hutton's place as acting commander of Camp Low. He is expected to arrive Sunday morning.

Dr. Hutton has been sick with ague ever since he came. He claims it was contracted at the quarantine station at Cape Charles, Va. Besides this, he suffers from chronic dyspepsia. He is fifty-five years old, and thinks younger men should have a chance to show what sort of work they are made of.

He served through the civil war and has been in the quarantine service in every yellow fever epidemic since then.

His New Jersey naturalization has been suspended as a supply train to the Hook every day as long as the quarantine. The cessation of this train would mean a great deal to the immigrants who are being received.
